

Work Experience

IMB Bank - Wollongong, NSW (2014 - Present)

Analyst Programmer (04/2016 - Present)

Strong focus on system modernisation and integration. Designed & implemented a Java based (Mulesoft) API integration layer exposing legacy core systems, SQL databases and external web services for consumption by high throughput web applications including Internet and Mobile Banking.

Played a significant role in the analysis, UI design and development of a responsively designed HTML5 web application to replace internal legacy applications whilst modernising business processes and adding automation. Member on-boarding process was reduced from 15 minutes to less than 3.

Assisted with the shift to a hybrid agile/traditional methodology including configuring and documenting procedures for git version control and API design guidelines to ensure maximum reusability and efficiency.

Programmer (Cadetship) (2015 - 04/2016)

Carried out maintenance and project based development work including completing unit and system testing on the unidata core banking system in line with the IMB software development lifecycle. Studied part time at UoW whilst working full-time and maintaining a HD average.

IT Trainee (2014 - 2015)

Provided first level phone and onsite support to NSW/ACT branch network while working along side software development and business intelligence teams performing basic software maintenance and testing.

Self Employed - Gerringong, NSW (2011 - Present)

Developed and maintain a number of Wordpress websites for local small businesses. Perform VHS to DVD conversion, video editing and general IT installation and support.

Technical Summary

HTML, CSS, JavaScript, Bootstrap, SASS, jQuery, Java, RESTful & SOAP JSON, XML, SQL, Objective-C, UniBasic, C#, PHP, Apache TomCat, Mulesoft ESB, C++, Citrix, VMWare vSphere, Active Directory
